OBJECTIVE

Motivated and detail-oriented web and software developer with hands-on experience in frontend, backend, and database development. Proficient in HTML, CSS, JavaScript, React, Python, Java, SQL, and Oracle, with experience building responsive and interactive applications. Passionate about optimizing backend processes and contributing to innovative web and software solutions while continuously expanding technical expertise.

EDUCATION

B. Tech (ECE) in Rajeev Gandhi Memorial College of Engineering and Technology

2021-2025

Percentage: 80%

TECHNICAL SKILLS

Programming Languages Python, Java

Web Development HTML5, CSS3, JavaScript, React, DOM Manipulation, Bootstrap

Databases SQL, Oracle

Version Control Git, GitHub

PROJECTS

CCTV Video Enhancement Using MSVD – MATLAB: Implemented a Modified Singular Value Decomposition (MSVD) algorithm in MATLAB to enhance low-quality CCTV video frames. The project focused on reducing noise while preserving key visual details to improve footage usability for surveillance and analysis. This project strengthened my skills in image processing, algorithm optimization, and problem-solving.

My Travel – Travel Web Application: Developed a fully responsive travel web application highlighting various destinations with interactive image galleries and destination guides. The application was designed for mobile and desktop devices and ensured cross-browser compatibility. This project allowed me to apply frontend design principles, DOM manipulation, and interactive web development skills effectively [[Project Link](#)].

Profile Card – Dynamic User Profile: Created a dynamic user profile web application featuring responsive profile cards with interactive hover effects. The design focused on a minimalist aesthetic while maintaining functionality across devices. This project enhanced my ability to implement dynamic content rendering, responsive design, and user-centric front-end interfaces [[Project Link](#)].

Movie Rating App: Developed an interactive movie rating application that allows users to input ratings and view results in real-time. The application leveraged JavaScript for functionality and HTML/CSS for layout and responsive design. This project provided hands-on experience in client-side programming, data validation, and creating interactive user interfaces [[Project Link](#)].

Portfolio Website: Developed my personal portfolio website to showcase my projects, skills, and experience. The website is fully responsive and interactive, featuring sections for projects, skills, and contact information. This project demonstrates my ability to design clean layouts, implement responsive web pages, and present my work effectively.
